

Electrolysis

14 Identify the correct products of electrolysis of the following electrolytes.

	<i>electrolyte being electrolysed</i>	<i>product at positive inert electrode (anode)</i>	<i>product at negative inert electrode (cathode)</i>
A	aqueous calcium bromide	bromine	calcium
B	aqueous copper nitrate	nitrogen	copper
C	aqueous potassium sulfate	oxygen	hydrogen
D	molten aluminium oxide	aluminium	oxygen
E	molten sodium chloride	chlorine	hydrogen
